Creativity comes from a conflict of ideas

### Proposal For

Siamakhassanpoo - Germany

Hybrid App ( For Android and Ios)

Proposal By:

Date:31, March 2021

Team,

Adiyogi Technosoft (P) Ltd.

## **Overview**

App development is now a day an essential part of business growth. If your business is related to products and services then this development plays a vital role in increasing business revenue and sales easily through Mobile Application.

We all know, everyone has a mobile phone, and everyone makes his life easy in terms of purchasing products and want every service at your doorstep in a single click without facing any trouble.

### **Advantages with us:**

- Huge saving of time and money with no compromise on quality.
- Premium Quality Apps designed to meet your requirements.
- Technical ability and infrastructure to cater to almost all types of mobile apps.
- Rich Mobile User experience developed over the years of implementation.
- Mobility Solutions that emphasizes business transformation and speed to market.
- Upgrade apps with changing platforms to gain maximum functionality and features.

## **Why Us**

We help global brands design and build superior digital products, enabling seamless user experiences across all modern platforms and devices. The company leads the entire mobile app development process from ideation and concept to delivery.

### **Approach:**

- Requirements Analysis
- Payment gateways
- Push Notifications
- Google Maps and GPS
- Front-end Development
- Back-end Development
- UI/UX Design
- Testing & QA
- API Integration
- App Submission

### Areas of expertise

- Food delivery app
- Grocery app
- Booking app
- Quiz app
- Payment gateway solution
- Map tracking configuration
- Sport app
- E-commerce app
- E-learning app

### **Your Requirement:**

#### Summary of the app:

1. every client has one folder at home and in this folder is a QR-Code that should be scanned by the employee every time they visit the patient.
2. There is a chatroom for the employee's in the app, so they can communicate together about work.
3. every client has a folder in the app, in the folder of the client are his/her personal data and the employee can also add documents of the client in this order by taking pictures and adding to it.
4. There is one folder in the app, where the employees can make notes about the extra things they did for a client. Not their daily things, only things that were different or new than the daily things. All the employees should be able to see this information. (Kind of notebook, handover)
5. there is one folder in the app for all the employee's, where all the employees can see their worklists. These worklists are made by the admin.
6. Each client should have a QR-code on their folder And the employee should be able to scan it every time they visit the client.
7. U guys generate QR code

## Our Development Work Flow:

### **Admin:- (It is super admin which is you)**

- Admin can login using Mobile No. and Password
- Manage Work Categories (Like- carpenter, electrician etc)
- Admin Can Manage Companies like Add, Edit, Delete, Status On/off
  - Company Name, (Text field)
  - Contact Person Name, (Text field)
  - Mobile No. (Text field)
  - Email id (Text field)
  - Company Logo. (Upload Image)
  - About Company (Text area)
  - Address (Text field),
  - Country (Select box),
  - State (Select box)
  - City (Select box)
  - Zip (text box)
  - Select Work Category (multiple)
- Manage Country, State, City (for all - admin can add a name for the country, state and city)

### **Company:- (Company Owner as company admin)**

- The company also can login in Admin side with Mobile No. and Password
- Manage Employee: like Add, Edit, Delete, Status On/off
  - Employee Name, (Text field)
  - Mobile No. (Text field)
  - Email id (Text field)
  - Employee Image. (Upload Image)
  - Address (Text field),
  - Country (Select box),
  - State (Select box)
  - City (Select box)
  - Zip (text box)

- Manage Client / Folder
  - Client/Folder Name, (Text field)
  - Mobile No. (Text field)
  - Email id (Text field)
  - Address (Text field),
  - Country (Select box),
  - State (Select box)
  - City (Select box)
  - Zip (text box)
  - QR Code Generate (Auto)
  
- Worklist
  - The company will create work into/for client/client Folder.
    - 1) Companies maintain all client work folders and they are getting work from offline mode from clients.
    - 2) Assign work on employee/employee Folder

**Employee:-**

- Register and login in mobile application, with Company code/name
- An employee can see all assigned worklist
- They can see work details with client address details of each work/client folder wise
- Scan QR code at client home/
- There is a chatroom for the employee's in the app, so they can communicate together about work.
- There is one folder in the app, where the employees can make notes about the extra things they did for a client. Not their daily things, only things that were different or new than the daily things. All the employees should be able to see this information. (Kind of notebook, handover)
- The same folder that the client has at home, the same copy of the offline folder should be in the app. The employees can also add documents, by taking pictures of the new documents or letters the client received and adding them to the clients' folder.

## **Technology**

- Advance PHP

**For Platform:** Android and ios. ( Hybrid app)
